

Continuous Integration (CI) and Continuous Deployment (CD)

Revolutionary way to implement **UdaPeople** product, a revolutionary concept in Human Resources.

INTRODUCTION

1. We are starting development of UdaPeople and seeking approval for a small investment to implement CI/CD, which will
 - a. Improve our ability to deliver **Value quickly** to our End Customers.
 - b. Improve the quality of product delivered to customers, hence retaining/**improving customer's trust** on our product.
 - c. Reduce the overall cost of development.
 - d. React quickly to change in market or Customer's behaviour.

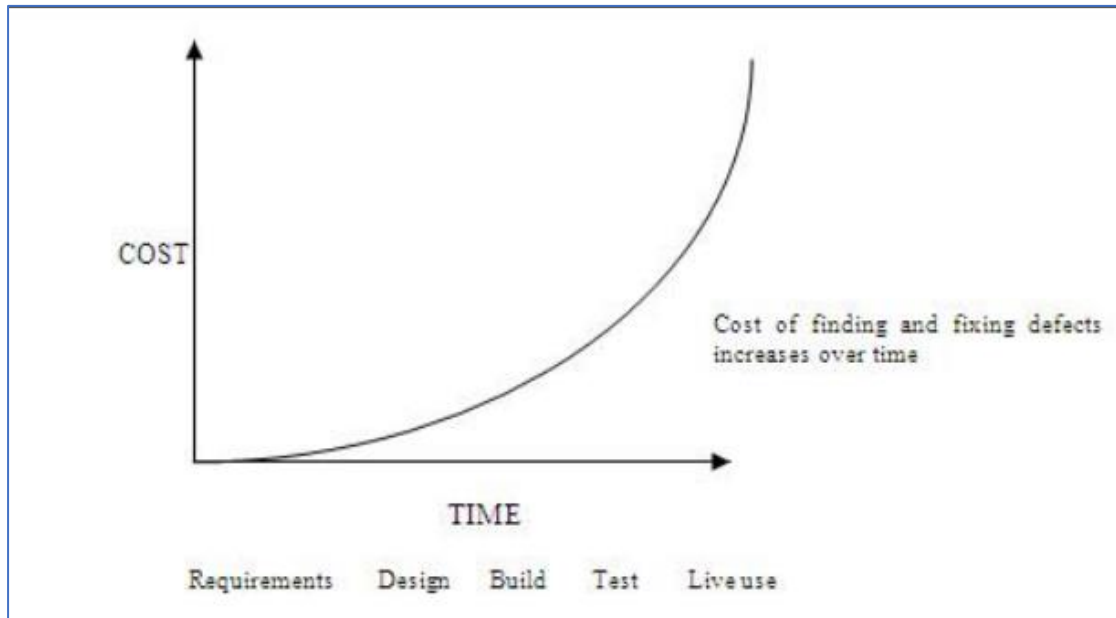

What is CI/CD?

Why CI/CD is a healthy investment?

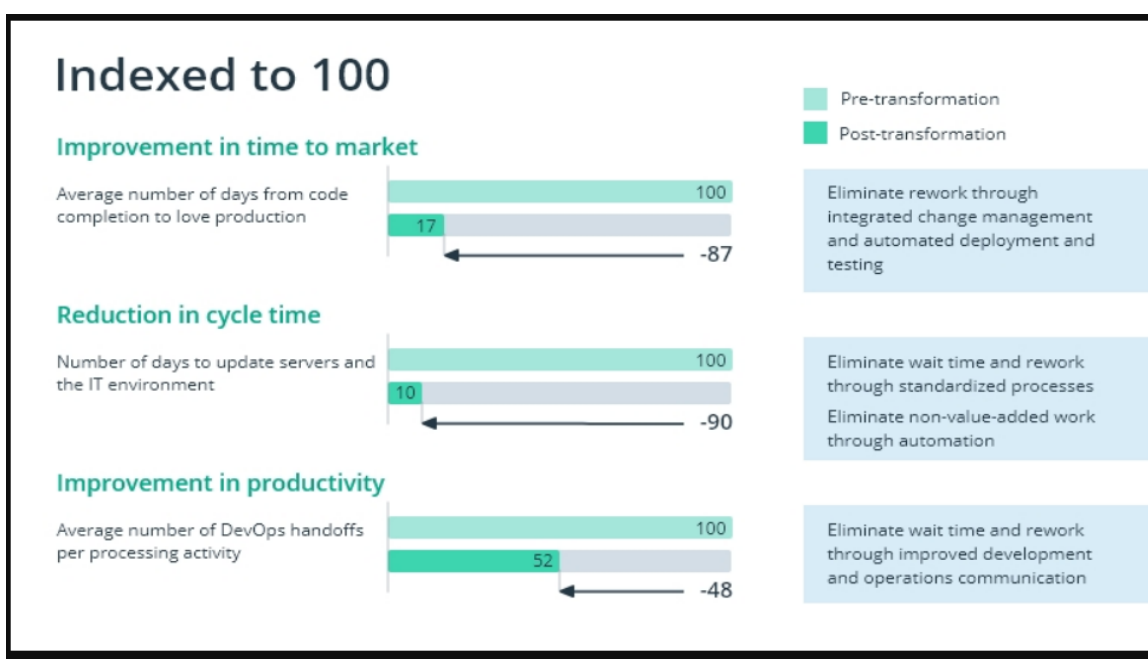

1. CI/CD reduces cost of fixing defects

Cost of fixing in a typical Development Life Cycle

2. CI/CD reduces cost of development while Increasing speed of Value delivery to End Customers

Comparison Pre/Post CI/CD Implementation
